

**IPAMS and the Wildlife Habitat
Council Present: An
Informational/Social Event and
Barbeque at Lake Lehow**

When: Saturday, October 10 at 11:30 am

Where: Lake Lehow, 11250 Waterton Road, Littleton, CO

What: Help the Denver-based oil and gas industry make a difference in the community! Learn how IPAMS is proposing to work with multiple partners to enhance Lake Lehow and the area surrounding it to create high quality wildlife habitat and to provide educational opportunities for kids in the Denver metro area. Network with IPAMS member-company individuals and discover potential future projects in which you and your company may want to participate.

Background Information

Lake Lehow is located in southeast Denver near Chatfield state park. The property is owned by Denver Water and managed by the Colorado Division of Wildlife (CDOW). The lake is host to CDOW's Angler Education clinics, run by Scott Gilmore.

Mr. Gilmore is also one of the founding members of the non-profit organization Environmental Learning for Kids (ELK). ELK programs introduce, immerse, educate, and mentor youth from ages 6 – 18 to Colorado's natural resources and related careers. ELK participants are able to use the lake for fishing as well.

The Wildlife Habitat Council (WHC) is a non-profit member conservation organization that works on public and private lands to encourage and help implement voluntary efforts of wildlife management, biodiversity conservation, and environmental education. IPAMS is a member of WHC, along with over 100 corporations, conservation organizations, non-profit and trade organizations. WHC staff was introduced to the Lake Lehow property by CDOW staff, and identified the opportunity for partnership with IPAMS.

IPAMS and WHC staff visited Mr. Gilmore at the Lake and determined that there was a good opportunity to pursue enhancement projects at the site which would lead to mutually beneficial relationships between all organizations involved.
